FOR RELEASE:
February 27, 1970

U.S. DEPARTMENT OF COMMERCE/Bureau of the Census

EXPORT AND IMPORT MERCHANDISE TRADE: JANUARY 1970

The Bureau of the Census, Department of Commerce, announced today that during January 1970, seasonally adjusted exports, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments amounted to $3,305.2 million and that January general imports, also on a seasonally adjusted basis, totaled $3,249.7 million. Comparable figures for December 1969 were $3,238.6 million for exports and $3,007.1 million for imports.[1] [2] January 1970 represents the 11th successive month for exports and the 10th successive month for imports that the monthly seasonally adjusted trade figures (exports and imports) have equaled or exceeded $3.0 billion.

For the 4-month period, October 1969-January 1970, seasonally adjusted exports averaged $3,318.2 million, a level about one and one-half percent higher than the average of $3,269.7 million reported for the preceding 4-month period, June-September 1969. Imports averaged $3,173.1 million for the period October 1969-January 1970, about 2 percent higher than the average of $3,121.7 million reported for the preceding 4-month period.

Seasonally adjusted export and import totals for selected Schedule A and B commodity sections and divisions are shown in tables 4 and 5. (Unlike the overall total, the commodity components for exports exclude foreign merchandise and include DOD Military Assistance Program Grant-Aid shipments.)

Exports, unadjusted for seasonal change and excluding Military Assistance Program Grant-Aid shipments, decreased from $3,362.6 million in December 1969 to $3,238.0 million in January 1970. With Military Assistance Program Grant-Aid shipments included, January exports were valued at $3,298.4 million as compared to $3,421.2 million for December 1969. Unadjusted general imports amounted to $3,125.5 million in January 1970 and $3,247.4 million in December 1969.

NOTE: 1970 seasonal adjustment factors updated by the introduction of monthly data for the full year 1969 are in the process of being computed and tested. Until these new factors become available, the 1969 seasonal factors will continue to be used. However, the 1970 working-day adjustment factors have been applied to obtain the combined adjustment factors. For January 1970 these working-day adjustment factors are as follows: for exports, 104.0 (compared to 104.3 in January 1969); for imports, 100.5 (as against 104.9 applicable to January 1969).

[1] *Adjusted for seasonal and working-day variation, but not for price level.*

[2] *Cumulations of data over at least 3- or 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following table with average percent month-to-month rise and decline over longer periods shown for comparison. The average rise and decline figures exclude percentage changes for: (1) the periods December 1964-May 1965 and December 1968-March 1969 because of abnormalities in the data due to effects of strikes; and (2) periods when negligible changes (zero percent) in the level of exports/imports occurred.*

Series	Month-to-month				Average monthly rates of change			
	Dec. 1969-Jan. 1970	Nov.-Dec. 1969	Oct.-Nov. 1969	Sept.-Oct. 1969	Average rise 1964-1969	Average decline 1964-1969	4 months Sept. 1969-Jan. 1970	12 months Jan. 1969-Jan. 1970
Exports....	+2.1%	-3.8%	+0.2%	+1.1%	+4.0%	-3.1%	-1.0%	+4.4%
Imports....	+8.1%	-6.4%	-0.3%	+5.5%	+3.5%	-3.2%	+1.7%	+4.5%

EXPLANATION OF STATISTICS

Import Statistics

General imports are a combination of entries for immediate consumption and entries into bonded warehouses. Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption.

The dollar value shown in the import statistics is defined generally as the market value in the foreign country and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended. None of the values have been adjusted for changes in price level.

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the month of import, which is based on the filing data of the import entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carryover of a small percentage of items from the actual month of importation to a subsequent month, usually the succeeding month. The carryover should have little effect on month-to-month comparisons of overall totals, since the carryover of the previous month should compensate roughly for that of the following month.

Export Statistics

Exports of domestic merchandise include commodities which are grown, produced, or manufactured in the United States, and commodities of foreign origin which have been changed in the United States from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States. Exports of foreign merchandise include commodities of foreign origin which have entered the United States as imports and which, at the time of exportation, are in substantially the same condition as when imported.

The dollar value shown in the export statistics is defined generally as the f.a.s. value at the U.S. port of exportation. These values have not been adjusted for changes in price level.

In general, compiling procedures provide for the inclusion of shipments in the statistics for the month of export.[2] However, as indicated above for imports, because of processing problems there has always been a carryover of a small percentage of shipments from their actual month of shipment to a subsequent month, usually the following month. The statement above regarding the effect of the import carryover generally applies to exports also.

Revisions to the Statistics

Revisions are carried into the statistics on a periodic basis. Data for 1969 and 1970 appearing in the 1970 monthly issues of this report are presented as follows:

1970 Statistics

a. January through November 1970 issues: figures are as originally issued, except as noted below.

b. December 1970 issue: figures reflect revisions for prior months of the year issued with December 1970 statistics.

1969 Statistics

a. January through May 1970 issues: figures reflect revisions issued with December 1969 statistics or earlier.

b. June through December 1970 issues: figures reflect revisions to 1969 data issued with June 1970 statistics.

In addition to the revisions which are made on a periodic basis, instances may occur where a significant error in the statistics for a month of the current year is discovered after the statistics for that month are compiled. If the error is of sufficient importance to require correction prior to the time that the regular revisions are carried, the correction is made and so noted in this report.

Sources of Further Information About Foreign Trade Statistics

Additional information regarding coverage, valuation, etc., is contained in the following publications: Report FT 990, Highlights of U.S. Export and Import Trade; FT 135, U.S. Imports, General and Consumption, Schedule A Commodity and Country; FT 410, U.S. Exports, Schedule B Commodity and Country; and the Guide to Foreign Trade Statistics. Information regarding additional sources of statistics, the methodology used in seasonally adjusting the data, and other matters relating to foreign trade statistics may be obtained from the Bureau of the Census, Washington, D.C. 20233.

---

[1]For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

[2]With minor exceptions, the date of export for shipments other than by mail is the date when the shipment leaves the United States, or, in the case of vessel or air shipments, the date when the carrier departs (or is cleared) from the port of export. For mail shipments, the date of export is considered to be the date of mailing.

Table 1. U.S. Exports, General Imports, and Merchandise Trade Balance, Adjusted for Seasonal and Working-Day Variation, by Month: January 1969 to January 1970

(In millions of dollars. Includes data on silver ore, base bullion, and refined bullion)

[1]Data reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. The adjusted totals reflect seasonal adjustment factors which became effective with March 1969 statistics. See note on front page.

[2]Data differ from those released in Department of Defense reports because of a difference in statistical definitions. For a further explanation, see footnote 2, table E-1, Report FT 990, Highlights of U.S. Export and Import Trade.

[1]Schedule B section and selected division descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related materials
4. Animal and vegetable oils and fats
5. Chemicals
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
   - 71. Machinery, other than electric
   - 72. Electrical machinery, apparatus, and appliances
   - 73. Transport equipment
8. Miscellaneous manufactured articles, n.e.c.
9. Commodities and transactions not classified according to kind

[2]Seasonally adjusted figures for section 7 may differ slightly from the sum of divisions 71, 72, and 73 since each is independently adjusted.

[3]Data reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. The adjusted data reflect seasonal factors which became effective with March 1969 statistics. See note on front page. The adjusted section totals in this table and similar overall monthly totals in tables 1 and 2 were developed independently.

[4]In the absence of demonstrable seasonal patterns for this section, no seasonal adjustment factors have been applied to date.

[5]As a result of the change, effective October 1969, in the category "Low-value shipments" (reflected in Schedule B section 9) which included estimated data for shipments valued under $100 prior to October and now includes shipments valued $250 and under, the statistics for the individual commodity sections and selected divisions reflect some additional undercounting.

Table 5. U.S. General Imports--Schedule A Sections, Seasonally Adjusted and Unadjusted by Month: January 1969 to January 1970

(In millions of dollars. Includes data on silver ore, base bullion, and refined bullion. Unadjusted totals represent sum of unrounded figures hence may vary slightly from sum of rounded amounts)

Period	Schedule A sections[1]

[1]Schedule A section descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related materials
4. Animal and vegetable oils and fats
5. Chemicals
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
8. Miscellaneous manufactured articles, n.e.s.
9. Commodities and transactions not classified according to kind

[2]Data reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. The adjusted data reflect seasonal factors which became effective with March 1969 statistics. See note on front page. The adjusted section totals in this table and similar overall monthly totals in tables 1 and 3 were developed independently.

[3]In the absence of demonstrable seasonal patterns for this section, no seasonal adjustment factors have been applied to date.

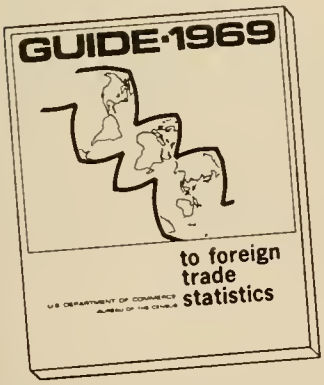
"GUIDE TO FOREIGN TRADE STATISTICS - 1969"



Why delve through thousands of facts concerning foreign trade when there's a quick way to find the exact data you need in the "Guide to Foreign Trade Statistics - 1969." The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of a myriad of data relating to the imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and hundreds of different reasons to require varied types of foreign trade data. The "Guide", therefore, includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1969.
